## Did you know?

- Breast reconstruction surgery is covered by insurance when a patient has had a diagnosis of breast cancer.
- Patients deserve to know their surgical options.
- A breast reconstruction consult can happen in conjunction with a general surgery consult for mastectomy.
- A recent study shows only 42% of women undergo breast reconstruction after a mastectomy.\*
- Partial breast reconstruction and surgeries to symmetrize breasts may be covered by insurance.
- Nipple areolar reconstruction is part of the reconstruction process.
- In addition to immediate reconstruction, delayed reconstruction is another option that is typically covered by insurance.
- Nipple tattooing is available for the final stage in the reconstruction process and most insurances will cover the cost.
