

# WOUND CARE CENTERS

**Our average patient  
satisfaction score is  
94%**

Kettering Health Network offers one of the largest wound healing programs in Southwest Ohio with healing rates superior to national benchmarks.

PERCENT OF WOUNDS HEALED:	AVERAGE DAYS TO HEAL:
Kettering Health Network 95.9%, National Benchmark 65.8%	Kettering Health Network 54 days, National Benchmark 105 days

*(Data as reported by the Wound Registry for US Outpatient Wound Centers (Medscape 2012).*

The team of physicians at each of the Kettering Health Network wound care locations will work in conjunction with you, the referring physician, to establish the most appropriate and individualized plan of care for your patient. Our team consists of on-site wound care physicians, outstanding wound nurses, certified hyperbaric nurses and technicians, and dedicated wound care technicians.

We promise to provide ongoing updates to every physician referring into our program.

Difficult-to-heal wounds can result from trauma, diabetes, venous stasis, congestive heart failure, and many conditions that reduce blood flow, resulting in hypoxic wounds. Kettering Health Network's Comprehensive Wound and Hyperbaric programs use the newest clinical tools and traditional treatments, including:

\*Locations offer hyperbaric chambers and wound care centers

# HYPERBARIC OXYGEN THERAPY

Kettering Health Network hyperbaric chambers are conveniently located in Miamisburg, Kettering, and Hamilton, Ohio.

Our centers offer adjunctive hyperbaric medicine for problem wounds as well as other indications. The Wound Healing and Hyperbaric Medicine Center at Sycamore Medical Center offers a multi-place hyperbaric chamber that can accommodate up to 12 patients and two medical attendants.

Kettering Medical Center provides 24/7 emergency hyperbaric services, covering all of southwest Ohio.

## MULTI-PLACE CHAMBER

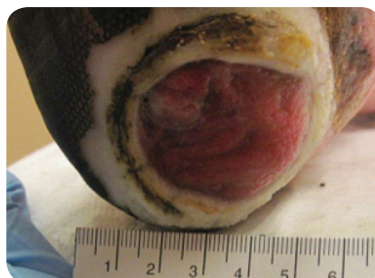

Sycamore Medical Center operates Ohio's largest, walk in hyperbaric chamber. The Class A chamber provides comfortable seating for multiple patients. Trained attendants are in the chamber with you during your treatments, monitoring your treatment and comfort.

## SINGLE CHAMBER

In our hyperbaric therapy centers at Fort Hamilton Hospital and Kettering Medical Center, you lie on a bed and our technicians will provide you with blankets, water, and a movie to watch during your treatment. The bed slides into an oxygen chamber. The clear chamber includes a microphone and speaker so you can speak with a trained wound healing staff member, during the course of your treatment.
